

FOODPACK Synergy

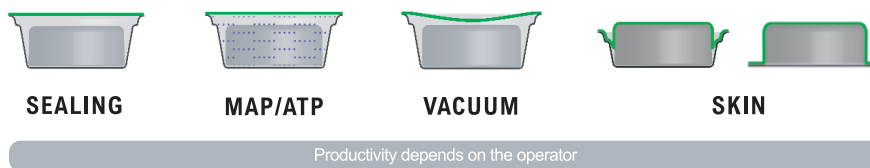

SCAN ME

🇬🇧 FoodPack Synergy represents the new benchmark for semi-automatic tray sealers. A new top-of-the-range entry for versatility and performance, it has been designed for demanding production environments, combining advanced technologies, a robust structure and a large sealing area. It allows MAP and SKIN packaging using the same mold, ensuring maximum operational flexibility.

🇮🇹 FoodPack Synergy rappresenta il nuovo punto di riferimento per le termosaldatrici semiautomatiche. New entry top di gamma per versatilità e prestazioni, è stata progettata per ambienti produttivi esigenti, combinando tecnologie avanzate, struttura robusta e un'ampia area di saldatura. Consente il confezionamento MAP e SKIN con il medesimo stampo, garantendo massima flessibilità operativa.

🇫🇷 FoodPack Synergy représente la nouvelle référence des thermo scelleuses semi-automatiques. Nouvelle arrivée haut de gamme en termes de polyvalence et de performances, elle a été conçue pour les environnements de production exigeants, en combinant technologies avancées, structure robuste et large zone de scellage. Elle permet le conditionnement MAP et SKIN avec le même moule, garantissant une flexibilité opérationnelle maximale.

🇪🇸 FoodPack Synergy representa el nuevo punto de referencia para las termoselladoras semiautomáticas. Nueva incorporación de gama alta por versatilidad y prestaciones, ha sido diseñada para entornos productivos exigentes, combinando tecnologías avanzadas, una estructura robusta y una amplia área de sellado. Permite el envasado MAP y SKIN con el mismo molde, garantizando la máxima flexibilidad operativa.

FP SYNERGY

Dimensions / Dimensioni / Dimensiones / Dimensions

1280 x h 1640 x 1088

Weight with mould / Peso con stampo / Peso con molde / Poids avec moule

450 kg

Pneumatic consumption / Consumo pneumatico / Consumo neumático / Consommation pneumatique

100 NI/cycle max. at 6 Bar

Sealing area / Area di saldatura / Área de sellado / Surface de scellage

400 x 300 h max MAP 135 mm

WHY CHOOSE SYNERGY?

● ONE TOOL MAP AND SKIN

MAP and SKIN packaging using the same mould, enabling fast changeovers and operational efficiency.

● HIGHER FLEXIBILITY

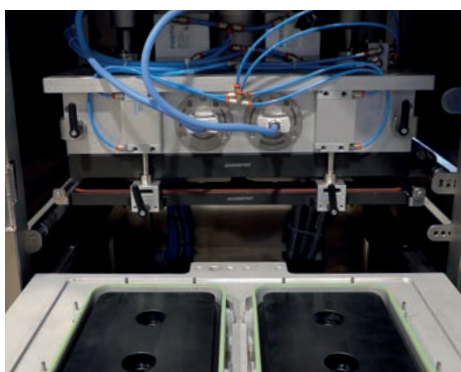

High versatility allows easy adaptation to different products and packaging requirements.

● DURABILITY AND PRECISION

A robust structure and advanced technologies ensure long-term reliability and precise, consistent sealing.

● INTUITIVE USER EXPERIENCE

User-friendly operation designed to simplify set-up, reduce errors and improve daily efficiency.

🇬🇧 FoodPack Synergy simplifies daily production thanks to fast learning and intuitive machine control, significantly reducing operator training time. The single-mould concept promotes standardized operations and more consistent processes, improving overall efficiency. Its compact dimensions make FoodPack Synergy easy to position in existing production environments, offering a smart solution also in terms of space optimization and investment.

🇮🇹 FoodPack Synergy semplifica la produzione quotidiana grazie a un apprendimento rapido e a un controllo macchina intuitivo, riducendo i tempi di formazione degli operatori. Il concetto di stampo unico favorisce operazioni standardizzate e processi più coerenti, migliorando l'efficienza. Le dimensioni compatte la rendono facilmente posizionabile in ambienti produttivi preesistenti, rappresentando una soluzione intelligente anche in termini di ottimizzazione dello spazio e investimento.

🇫🇷 FoodPack Synergy simplifie la production quotidienne grâce à une prise en main rapide et à un pilotage intuitif de la machine, réduisant significativement les temps de formation des opérateurs. Le concept de moule unique favorise des opérations standardisées et des processus plus cohérents, améliorant l'efficacité globale. Ses dimensions compactes rendent FoodPack Synergy facilement positionnable dans des environnements de production préexistants, constituant une solution intelligente également en termes d'optimisation de l'espace et d'investissement.

🇪🇸 FoodPack Synergy simplifica la producción diaria gracias a un aprendizaje rápido y a un control intuitivo de la máquina, reduciendo significativamente los tiempos de formación de los operarios. El concepto de molde único favorece operaciones estandarizadas y procesos más coherentes, mejorando la eficiencia global. Sus dimensiones compactas hacen que FoodPack Synergy sea fácil de colocar en entornos productivos preexistentes, representando una solución inteligente también en términos de optimización del espacio y de inversión.
